One of today's main objectives of AFR study is to employ advanced and developing technologies, tools and techniques into the overall study, research, and documentation of Building Conservation, enabling AFR to be a central player in the historical investigation of preservation and conservation projects. Hosted by the David Azrieli school of Architecture, Tel Aviv University, the 7th International AFR Conference will bring together members of the architectural finishes research community worldwide, to continue to strive for the international standardization of the field, the cooperation between professionals, and the distribution and sharing of knowledge.
